

Installing R and Practicing pdf file submission

1. In this course, you will need access to a computer and the program R, which is a very popular open source statistical program. If you don't have R installed on your computer yet, click on this link and follow instructions:

<https://www.datacamp.com/community/tutorials/installing-R-windows-mac-ubuntu>

Note: you only need to install R. RStudio is a graphical interface running on top of R and it is optional.

2. You will also need to know how to submit assignments and tests onto CourseSpaces.

- a) Complete the quiz in the following page and save it as a pdf file:

If you have a scanner, scan it, and save it as a pdf file; or

If you have a smart phone, you can follow the instructions given on this CourseSpaces; or

You are free to use other ways to produce such pdf file. Here is the link for some suggestions for smart phone users:

<https://pdf.wondershare.com/mobile-app/free-pdf-scanner-app.html>

Before you submit the file, make sure it is legible and is in the right orientation.

Click on the "Test File Submission Drop Box" and submit the file.

Stat 260 Quiz 0

Instruction: Fill in your name and student number, then answer the following questions.

Name: _____ **Student #:** _____

1. Compute the average of the following numbers:

10, 20

2. Solve: $2x = 2$.
